

垃圾房臭味及衛生評估

垃圾房長期存放垃圾，細菌容易繁殖，裏面所產生的臭味日積月累，會影響附近使用者。

Garbages in refuse collection rooms provides a great condition for bacteria growth and produce odor. These problems may affect users nearby.

臭味量度 Odor Measurement

環境化驗提供氣味測量，由合資格測試員利用專業儀器進行客觀的氣味測量，並提供數值作為參考。

除了氣味，我們也有儀器量度空氣中的揮發性有機化合物，測試其濃度，檢視有害與否。

ELL provides odor measurement service, qualified staff will perform objective odor sensing by the olfactometer. An odor value indicates the level of smelliness.

Besides odor level, we can also measure the TVOCs in air to ensure the safety.

TVOCs gas monitor

細菌檢驗 Bacteria Test

此外，我們提供環境衛生評估，包括現場塗抹取樣和空氣中細菌取樣，檢驗常見的細菌及其數量，完成後會提供完整報告。

Moreover, we provide swab test and air test for testing common bacteria found in refuse rooms. Formal report will be provided afterwards.
